

Bill Pritchett

Regional APO Manager for Microsoft

Background:

Bill Pritchett is a Regional APO Manager for Microsoft focused on Application Platform Optimization technology framework covering the geographical territory of the Central U.S. and focused on a framework for covering six key technology areas: Business Intelligence, SOA/Business Process Management, Application Development, User Experience, Business Applications, and Data Management. Each of these areas is mapped from a business focus and concentration to provide an engagement model, for the APO Specialist team to utilize for insight and information to help mature a company's technology assets across all technology areas. Additionally, Bill's current role has the added scope of the dedicated resource for Cloud Computing for this region, which requires discussion, presentation, build-out of POC engagements and evangelizing the Cloud Platform Technology for Microsoft. Prior to this current position, Bill was tasked with a regional team working in a direct client-facing role regularly meeting with CIO level people discussing the investment and roadmap strategy for proving value and solving business problems with Microsoft Technologies.

Prior to Microsoft, Bill's career spans the technology industry from 1986 to present and with many various diverse roles. These roles include Business Owner, Vice President of Engagement Strategy, Senior Software Architect, Lead Consultant, Lead Developer, VP of Operations, as well as several key roles in startup companies.

Bill is also active in the community supporting Youth Sports and Technology in Schools.
