

Emerging Threats in 2012

Spend a day with IBM X-Force®. Leave better prepared to protect.

Amidst the near constant reports of data leaks, Denial-of-Service attacks, and social Hactivism, IBM X-Force declared 2011 the “year of the security breach”. Although it is early in 2012, the frequency and scope of these attacks continue to rage on. In an increasingly connected world, incidents like these magnify the challenge enterprises face as they attempt to protect against the looming threat of attack.

Please join world renowned experts from IBM X-Force and the Institute for Advanced Security for this session where we will dive into the findings of our latest Trend and Risk report, explore options to protect against threats, and share real world demonstrations of the latest online security solutions and strategies.

Security Intelligence.
Think Integrated.

DATE

TIME	DESCRIPTION
8:00 AM	Registration
8:30 AM	IBM X-Force: The Year of the Security Breach. <i>An in-depth analysis of our findings from 2011 and an early look at predictions for 2012</i>
9:15 AM	Application Vulnerabilities. <i>Evidence that ongoing scanning, analysis and remediation is having a positive effect on the quality of Internet software.</i>
10:00 AM	Refreshment Break
10:15 AM	Network & Endpoint Protection. <i>Advanced threat protection for your infrastructure.</i>
11:00 AM	Security Intelligence. <i>To stay ahead of threats, organizations need to connect analytics and intelligence for better prediction and detection.</i>
11:45 AM	Securing the Cloud. <i>Considering cloud? What you need to know.</i>
12:30 PM	Lunch

X-Force Evolving Threat event
